Seawork have a range of diving systems. These include Containerised Dive Controls and / or decompression chambers or combined units. In addition, we have Trailer Mounted Dive Systems, Skid mounted scuba replacement units and Portable dive kit.

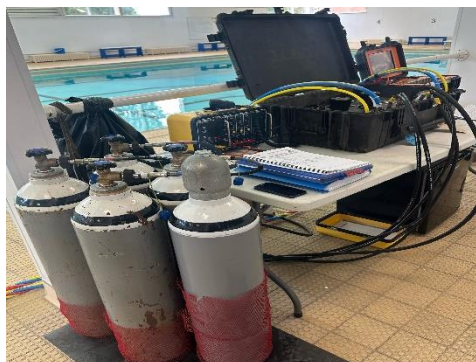

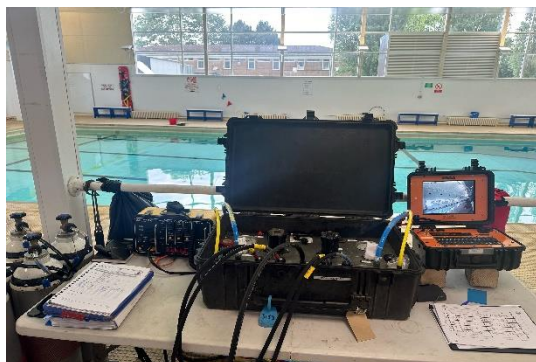

This unit (Port 01) is the smallest, lightest, and most compact dive system, however it is very capable and fully meet the requirements for inland Inshore Diving Operations.

2 Diver Portable Dive Kit – Port 01

The system is individually housed in Peli cases to protect from any damage by handling, transport and weather. This system is rugged, man-handable and can work on most sites.

Audited to IMCA DO23 with full certification packages and equipped with First Aid kit, and an oxygen therapy kit.

A complete surface demand dive system, portable so that it is quick and easy to transport move and assemble and can be setup almost anywhere (as shown above inside buildings) and still be fully compliant and safe. Can be supplied with Low-Pressure Compressor and or High-Pressure Compressor to extend duration as well as colour video systems.
